

Street Lighting Guidelines

October 23, 2007

Revised: September 16, 2009

Street lighting is for convenience and ambience only. Street safety is the responsibility of pedestrians, cyclists and motorists. Personal/private property security or safety lighting is not provided by the City. The City shall not install street lighting in alley ways.

Street lighting may be added upon request when adherence to the guidelines below is achieved and funds to increase the total street lighting inventory are available in the annual operating budget.

- 1) All requests for new street lighting must be submitted in writing and provide:
 - a) Date of request
 - b) Name and address of requestor
 - c) Address or location where light is requested
 - d) Whether neighborhood electrical distribution system is underground or overhead
- 2) Street lights must be spaced a minimum of 250 feet apart.
- 3) The property owner/requestor will be responsible for acquiring any necessary utility easements and associated expenses.
- 4) Street lights will not be installed without the adjacent property owner's written approval.
- 5) City will be responsible for physical installation costs, in accordance with Oncor Electric Delivery's fee schedule, for costs of conductors, conduit, bases, poles, fixtures or luminaires.
- 6) City will be responsible for operation and maintenance costs, in accordance with Oncor Electric Delivery's fee schedule.
